

What to do if you run out of gas...

You should always fill your tank up anytime your fuel gauge goes below half-a-tank. Also, never go out on a cold or hot day or night without a full tank of gas and a cell phone.

If you do find yourself running out of gas - put your hazard lights on and pull over to the shoulder of the road so others can see you. If it's dark, turning on your dome lights, raise the hood, and tie a white cloth to your antenna, car door, or trunk. Having a large "HELP" sign, reflector triangles, and/or flares in your trunk can always be a benefit.

Stay in your car with the doors locked. Don't open your doors for anyone. Slightly open your window and ask the person to call the police.

Of course, if you can safely walk to retail outlet and wait you should do so. Although, be careful walking on the shoulder of the road - this can be extremely dangerous possible.
