

## Driving in Rain

Did you know rain can mix with oil on the road? Obviously, this can make driving in rain very hazardous. If you take this into consideration, always increase the distance between your car and the one in front of you. Also, be careful when turning - braking can make you lose traction.

Ever experience hydroplaning in your car when it's raining hard? Hydroplaning is when your car's tires lose contact with the pavement and then float on water. If you don't like having your heart stop from fear take our advice - slow down.

If you do find your car hydroplaning, ease off the accelerator and don't brake, or steer suddenly. The vehicle's traction should return momentarily.
